### **Explanation of Expected Variance**

During the quarter ended May 31, 2018, the Company's net loss increased significantly over that for the quarter ended May 31, 2017. Such net loss is expected to be approximately 68% greater than the net loss for the quarter ended May 31, 2017. Nearly all of the increase in the net loss is attributable to the change in the calculated value of the derivative liabilities associated with the Company's debentures. However, this change is a non-cash expense.
