NOTE 1 - ORGANIZATION AND DESCRIPTION OF BUSINESS

The accompanying unaudited financial statements of Anpath Group, Inc. (“Anpath” or “the Company”) for the three months ended September 30, 2015 have been prepared in accordance with generally accepted accounting principles in the United States of America, pursuant to the rules and regulations of the U.S. Securities and Exchange Commission for interim financial information. Accordingly, the financial statements do not include all information and footnotes required by generally accepted accounting principles in the United States for complete annual financial statements. In the opinion of management, the accompanying unaudited condensed interim financial statements reflect all adjustments, consisting of normal recurring adjustments, considered necessary for a fair presentation. The accompanying financial statements should be read in conjunction with the financial statements and notes thereto included in the Company’s March 31, 2015 Annual Report on Form 10-K.The principal business of Anpath Group, Inc. (hereinafter “the Company”) is a holding company. The Company’s sole subsidiary is EnviroSystems, Inc. (hereinafter “ESI”).

The Company through its subsidiary, ESI, plans to begin producing disinfecting, biocidal, sanitizing, and cleaning products designed to help prevent the spread of infectious microorganisms and control the growth of these disease-causing microbes, while minimizing the harmful effects to people, animals, surfaces and the environment. ESI intends to exploit its technology platform through the development and licensing/private labeling of its technology in several product categories. The Company’s chemical emulsion technology will permit ESI to offer a wide range of disinfectant/biocides/sanitizer/cleaner/antiseptic products for a variety of applications and markets. The Company ’ primary focus is the market introduction of GeoTru ™ Geobiocide, for use in the oil and gas industry, specifically for hydraulic fracturing and microbial control in fracking fluids. ESI will also opportunistically seek to license/private label its technology/products for surface disinfection.

NOTE 2 – GOING CONCERN

As shown in the accompanying financial statements, we have incurred net losses of $790,671 and $508,910 for the six months ended September 30, 2015 and 2014, respectively. In addition, we have an accumulated deficit of $7,011,930 and a working capital deficit of $1,433,043 as of September 30, 2015. These conditions raise substantial doubt as to our ability to continue as a going concern. In response to these conditions, we may raise additional capital through the sale of equity securities, through an offering of debt securities or through borrowings from financial institutions or individuals. The financial statements do not include any adjustments that might be necessary if we are unable to continue as a going concern.

NOTE 3 – FAIR VALUE MEASURE AND DERIVATIVE LIABILITIES

The Company measures fair value in accordance with a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1
Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2
Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3
Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The following table sets forth the Company's consolidated financial assets and liabilities measured at fair value by level within the fair value hierarchy. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

	Total	Level 1	Level 2	Level 3
LIABILITIES:				
Derivative Liabilities	$738,203	-	-	$738,203

On July 2, 2014, the Company issued debentures that were convertible into shares of common stock. The debentures conversion price will be adjusted depending on various circumstances. The conversion options embedded in these instruments contain no explicit limit to the number of shares to be issued upon settlement and as a result are classified as liabilities under ASC 815. Additionally, the Company issued in connection with the debentures 2,905,000 warrants to purchase the company common stock. The conversion price will be adjusted depending on various circumstances, and as there is no explicit limit to the number of shares to be issued upon settlement they are classified as liabilities under ASC 815. On July 22, 2015, the Company effected a 1 for 7 reverse stock split, due to this split, the outstanding warrants were reduced to 415,000 and the conversion price was increased to $2.45 per warrant. The conversion option and warrants had a fair value of $1,088,839 of which $386,706 was classified as a debt discount on the debentures and $340,978 was recorded as a day 1 loss on the fair value of the derivative liability as the total discount is capped at the fair value of the debt. The change in fair value from the grant date to the year ended March 31, 2015 was recorded as a gain in the income statement of $693,743 The change in fair value for the six months ended September 30, 2015 was recorded as a loss in the income statement of $684,085.

On September 23, 2015, the Company and the holders of the debentures agreed to modification of the terms of the debentures. In the agreement, the maturity date of the debentures was extended to July 31, 2016 and the conversion price was restated to $.21 In accordance with ASC 470-60, the Company assessed if the modification qualifies as a Trouble Debt Restructuring. Based on this assessment, there were no accounting impact to debentures value.

The following is a reconciliation of the conversion option liability and embedded warrant liability for which Level 3 inputs were used in determining fair value

Beginning balance March 31, 2015	$	54,118
Additions due to new convertible debt and warrants		-
Mark to market of debt derivative		684,085
Debt derivative as of September 30, 2015	$	738,203

The Company's conversion option liabilities are valued using pricing models and the Company generally uses similar models to value similar instruments. Where possible, the Company verifies the values produced by its pricing models to market prices. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit spreads, measures of volatility and correlations of such inputs. These consolidated financial liabilities do not trade in liquid markets, and as such, model inputs cannot generally be verified and do involve significant management judgment. Such instruments are typically classified within Level 3 of the fair value hierarchy. The Company uses the Black Scholes Option Pricing Model to value its derivatives based upon the following assumptions: dividend yield of -0-%, volatility of 363 to 442%, risk free rate of 0.0257% and an expected term of .75 years to 4.50 years.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Not required.

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as defined in Rule 13a-15(e) under the Exchange Act as of the end of the period covered by this Quarterly Report on Form 10-Q. In designing and evaluating the disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based on that evaluation, our chief executive officer and chief financial officer concluded that, as of September 30, 2015, our disclosure controls and procedures were not effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules, regulations and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure. This material weakness is due to a lack of adequate internal controls and the absence of an audit committee.

Changes in internal control over financial reporting

There were no changes in our internal controls over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to affect, our internal control over financial reporting.
